# Introduce

recor**Diary** = Record + **Diary**

---

If you use this app,  
You can use various functions in diary  
make daily life easier.

---

# Contents

## Speech recognition

Voice recognition text storage function.

S

## Schedule manage with Calendar

Edit and write schedule in the form of a calendar.

C

Choose emoticon that suits your mood and tag the music

## Music tag and mood expression

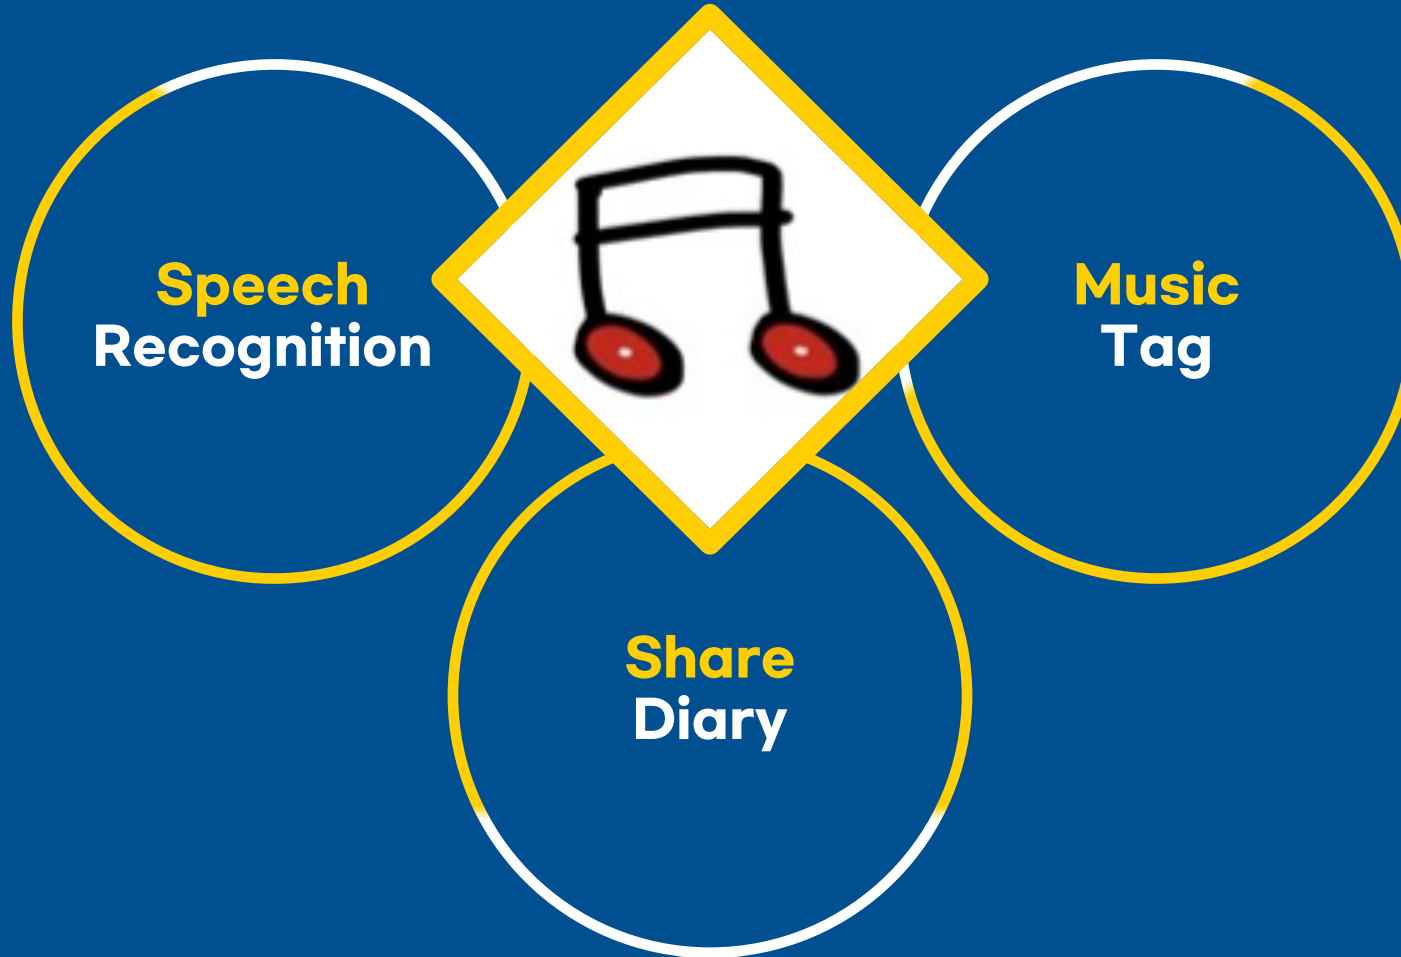

M

You can shared diary with designated people.

## Share diary with designated Friends

F

# Key feature

# Progress

Google APIs

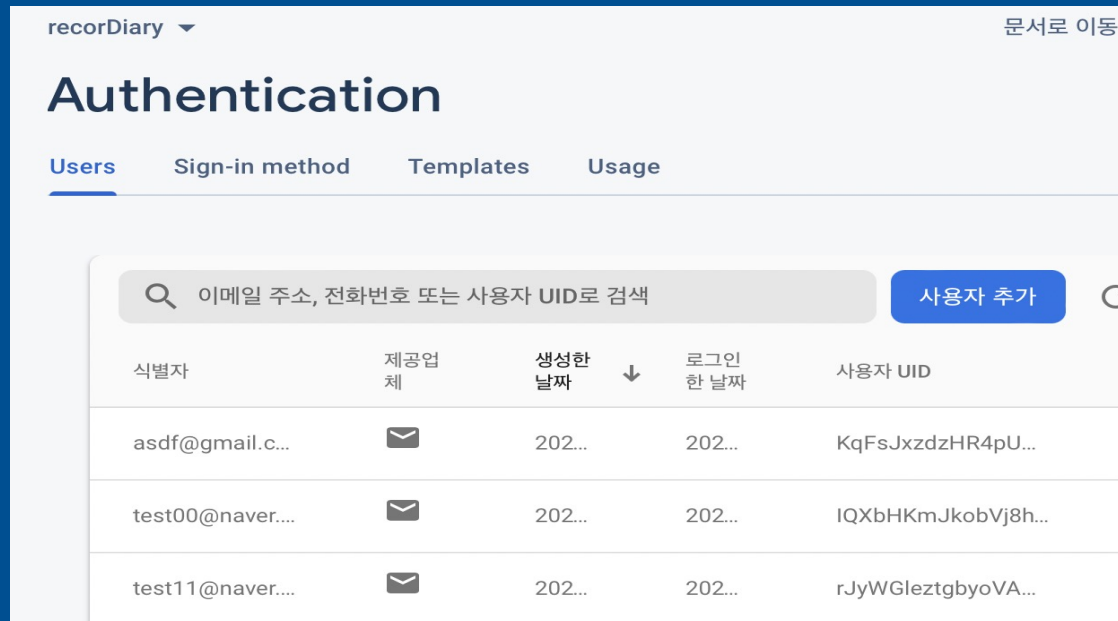

Android  
Studio

Firebase

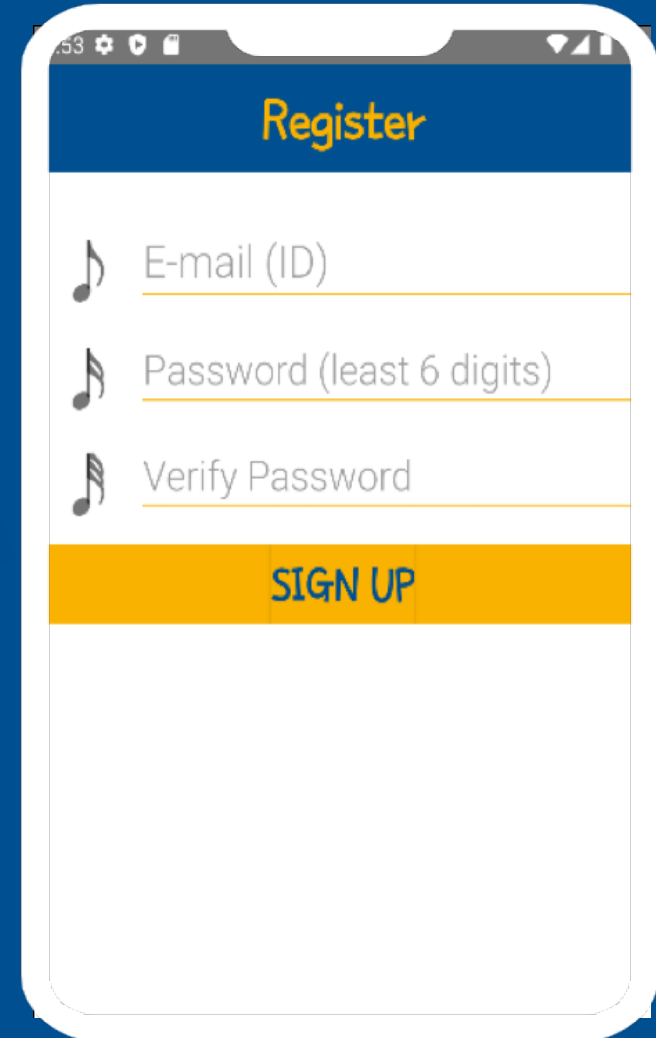

# Technology

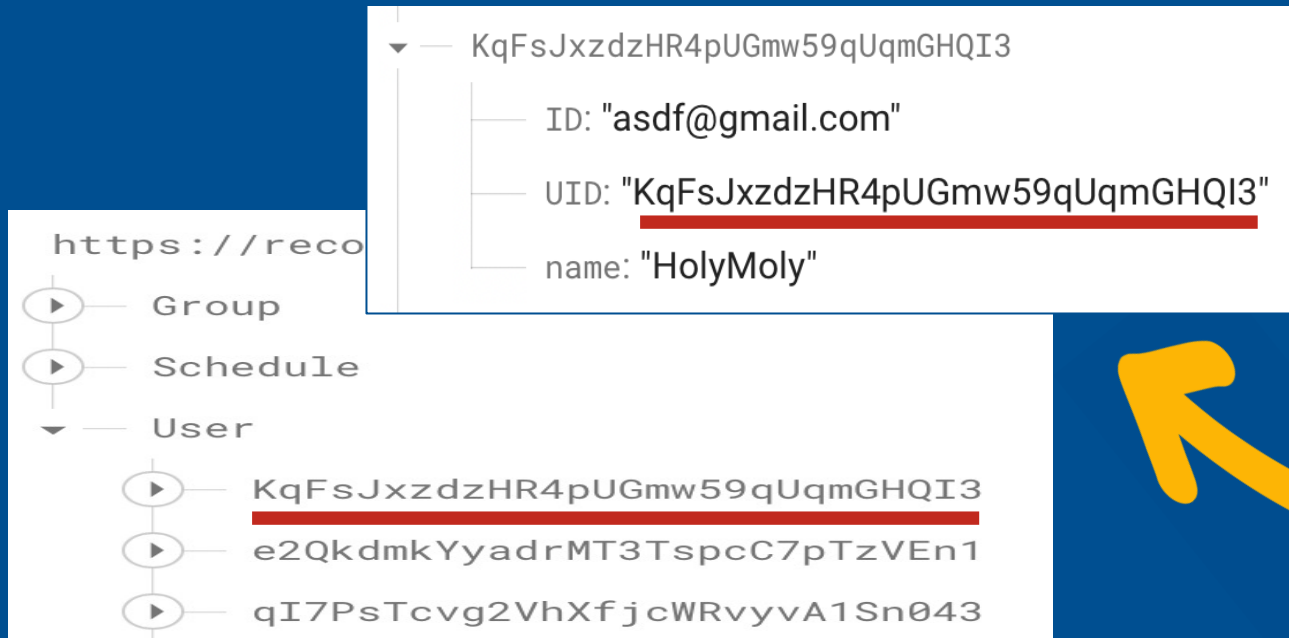

## Sign up System

A window that users can register information in **firebase**.

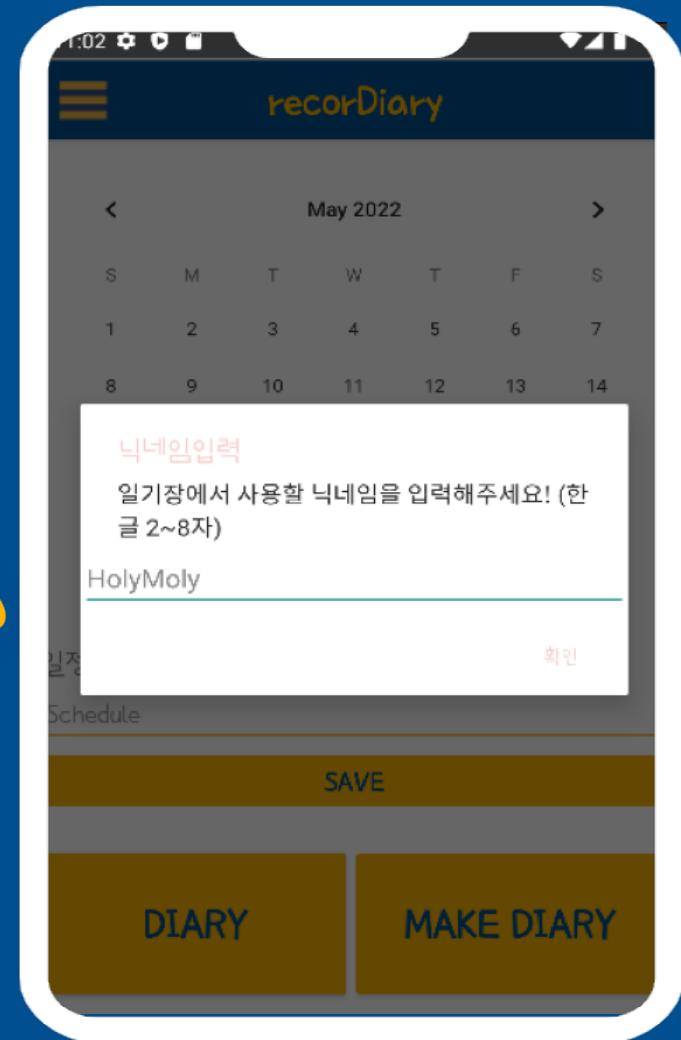

# Technology

## Set Nickname

You can set your **nickname** for our diary.

# Technology

```
save_button.setOnClickListener(new View.OnClickListener(){
    @Override
    public void onClick(View view){
        String edit_schedule = String.valueOf(editText.getText());
        if (date[0] == null)
        {
            toast( text: "날짜를 선택해 주세요");
        }
        if (edit_schedule.equals(""))
        {
            toast( text: "일정을 입력해 주세요");
        }
        else {
            Intent intent = new Intent( packageContext: Make_diary_Activity.this, DB.class);
            intent.putExtra( name: "CODE", Write_Schedule_CODE);
            intent.putExtra( name: "keyUserID", firebaseUser.getDisplayName());
            intent.putExtra( name: "keySchedule", edit_schedule);
            intent.putExtra( name: "keyDate", date[0]);
            editText.setText("");
            startActivity(intent);
        }
    }
});

del_button.setOnClickListener(new View.OnClickListener() {

**Schedule Calender**  
Edit and write the **schedule**  
for each day in form of a calender

# Technology

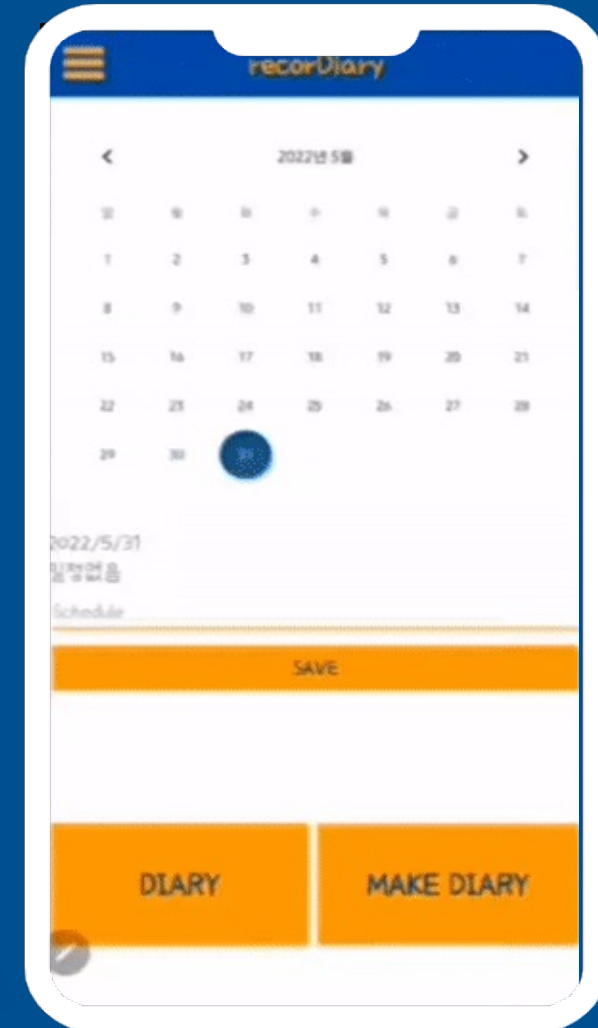

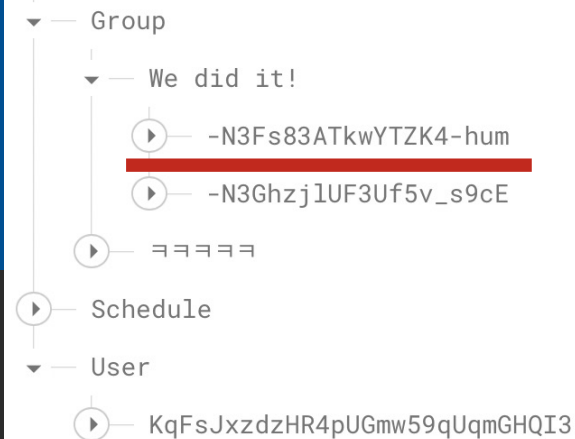

## Add Main Diary

A place to create a diary that can **share** with your friends

```
findViewById(R.id.Create_diary ).setOnClickListener( new View.OnClickListener() {  
    // Do processing Title or Diary nullException  
    @Override  
    public void onClick(View v) {  
        if(Diary_name_text.getText().toString().isEmpty()){  
            Toast.makeText( context: make_new_diary.this, text: "일기장 제목을 입력하세요.", Toast.LENGTH_SHORT ).show();  
        }  
        else if(Diary_name_text.getText().toString().contains( "_" )){  
            Toast.makeText( context: make_new_diary.this, text: "올바르지 않은 형식입니다.", Toast.LENGTH_SHORT ).show();  
        }  
        else{  
            String Diary_Title = UID + "_" + Diary_name_text.getText().toString();  
            String[] Friend_UID = {  
                Friendtext1.getText().toString(),  
                Friendtext2.getText().toString(),  
                Friendtext3.getText().toString(),  
                Friendtext4.getText().toString();  
            }  
            for(int i =0; i < count; i++){  
                UID_List.add(Friend_UID[i]);  
            }  
        }  
    }  
});
```

```
public class ViewHolder extends RecyclerView.ViewHolder {  
    public TextView textview;  
    public ViewHolder(View itemView) {  
        super( itemView );  
        textview = itemView.findViewById( R.id.Diary_Title );  
        itemView.setOnClickListener(new View.OnClickListener() {  
            @Override  
            public void onClick(View v) {  
                int pos = getAdapterPosition() ;  
                if (pos != RecyclerView.NO_POSITION) {  
                    if (mListener != null) {  
                        mListener.onItemClick(v, pos) ;  
                    }  
                }  
            }  
        });  
    }  
}
```

<https://recordiary-bb8f1-default-rtadb.firebaseio.com/>

# Technology

```
// Do processing Title or Diary nullException
@Override
public void onClick(View view) {
    String Title = Titletext.getText().toString();
    String Diary = Diarytext.getText().toString();

    Date date = new Date();
    SimpleDateFormat sdf = new SimpleDateFormat( pattern: "yyyy-MM-dd");
    String str_date = sdf.format(date);

    if (Title.equals(""))
    {
        Toast.makeText(getApplicationContext(), text: "제목을 입력해 주세요", Toast.LENGTH_SHORT).show();
        return;
    }
    if (Diary.equals(""))
    {
        Toast.makeText(getApplicationContext(), text: "일기 내용을 입력해 주세요", Toast.LENGTH_SHORT).show();
        return;
    }
}
```

## Write Daily Diary

**Voice** recognition and **mood** emotion, **image** input are possible on this page.

```
Group
├── We did it!
│   └── -N3Fs83ATkwYTK4-hum
│       ├── datetext: "2022-05-29"
│       ├── diarytext: "Finally we made recorDiary. This is very cool."
│       ├── emotion: "good" 🗑️
│       ├── imagepath: "We did it!/2022-05-29/5/30.png"
│       ├── titletext: "5/30"
│       ├── writeUID: "73R5DJykOZMSh0MSwZFfAXg4jqG3"
│       └── writeUser: "ㄷㄷ"
```

# Technology

## Add Detail Diary

Voice recognition and mood emotion, music tag possible on this page.

```
switch (view.getId()) {
    //녹음 버튼
    case R.id.recordBtn:
        if (!recording) { //녹음 시작
            StartRecord();
            Toast.makeText(getApplicationContext(), text: "지금부터 음성으로 기록합니다.", Toast.LENGTH_SHORT).show();
        }
        else { //이미 녹음 중이면 녹음 중지
            StopRecord();
        }
        break;
    default:
        break;
}

@Override
public void onResults(Bundle results) {
    // 말을 하면 ArrayList에 단어를 넣고 textView에 단어를 이어줍니다.
    ArrayList<String> matches =
        results.getStringArrayList(SpeechRecognizer.RESULTS_RECOGNITION);
    String originText = Diarytext.getText().toString(); //기존 text

    // 이후 for문으로 textView에 setText로 음성인식된 결과를 수정해줍니다.
    // 인식 결과
    String newText="";
    for(int i = 0; i < matches.size() ; i++){
        newText += matches.get(i);
    }
    Diarytext.setText(originText + newText + " "); //기존의 text에 인식 결과를 이어붙임
    mRecognizer.startListening(intentRecord); //녹음버튼을 누를 때까지 계속 녹음해야 하므로 녹음 재개
}
```

# Technology

## Add Emotion Diary

Use the **checkboxes** to select emotions

```
if(checkBox_P.isChecked()) {
    // perfect db에 전송
    emotion = "perfect";
    Toast.makeText(getApplicationContext(), text: "perfect", Toast.LENGTH_SHORT).show();
    intent.putExtra( name: "CODE", REQUESTCODE);
    intent.putExtra( name: "keyGroup", curGroup);
    intent.putExtra( name: "keyUser", curUser);
    intent.putExtra( name: "keyDate", str_date);
    intent.putExtra( name: "keyTitle", Title);
    intent.putExtra( name: "keyDiary", Diary);
    intent.putExtra( name: "keyPath", String.valueOf(filePath));
    intent.putExtra( name: "emotion", emotion); //추가

    startActivity(intent);
    finish();
}
else if(checkBox_G.isChecked()) {
    // good db에 전송
    emotion = "good";
    Toast.makeText(getApplicationContext(), text: "good", Toast.LENGTH_SHORT).show();
    intent.putExtra( name: "CODE", REQUESTCODE);
    intent.putExtra( name: "keyGroup", curGroup);
```

```
    startActivity(intent);
    finish();
}
else
{
    Toast.makeText(getApplicationContext(), text: "감정을 선택해 주세요", Toast.LENGTH_SHORT).show();
    return;
}
```

## Play Emotion Music

Play **music** that fits your chosen emotions

```
// 배경음악 부분
startButton = findViewById(R.id.start);
stopButton = findViewById(R.id.stop);

String music = intent.getExtras().getString( key: "emotion" );

startButton.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View view) {
        Toast.makeText(getApplicationContext(), music, Toast.LENGTH_SHORT).show();
        if(music.equals("perfect")) {
            // MediaPlayer 객체 할당
            mediaPlayer = MediaPlayer.create( context: Select_Diary.this, R.raw.perfect);
            mediaPlayer.start();
            mediaPlayer.setLooping(true);
        }
    }
});
```

```
stopButton.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View view) {
        // 정지버튼
        mediaPlayer.stop();
        // 초기화
        mediaPlayer.reset();
    }
});
```
